SUMMARY

Backend Developer with 2+ years of experience in designing and building scalable, high-performance backend systems using Python, Django, and FastAPI. Strong experience in developing RESTful APIs, optimizing databases (SQL & MongoDB), and improving API performance. Proven ability to build production-ready systems in logistics and e-commerce domains with a focus on scalability, performance, and clean architecture.

TECHNICAL SKILLS

Programming & Backend Development:

- Python
- Django
- FastAPI
- RESTful API Development
- Git & GitHub

Database & Optimization:

- MySQL
- MongoDB
- SQL Optimization
- Database Indexing
- Aggregation Pipelines

Concepts:

- Microservices Architecture
- Caching, Celery
- Swagger, Postman
- System Design
- Database Design
- API Optimization
- JWT, OAuth2

EXPERIENCE

Python Developer, AIVS PINCODEKART PVT LTD

Indian hybrid e-commerce platform connecting local sellers, manufacturers, and customers across 19,000+ pincodes.

- Developed scalable backend systems using Django and FastAPI.
- Built RESTful APIs for AWB tracking, shipment routing, and dashboard analytics.
- Designed and optimized MongoDB queries, enhancing data retrieval efficiency.
- Reduced API response time by 30% through database indexing and query optimization.

11/2025 – Present
Udaipur, India

Associate Software Developer, Xotiv Technologies

Software development company focused on providing innovative solutions

- Developed scalable backend systems and RESTful APIs using Django.
- Designed and optimized MySQL database schemas for scalable and efficient application performance.
- Reduced API response time by 30% through SQL query optimization and database indexing.

12/2024 – 10/2025
Noida

Data Annotator, Cashify

Fast-growing startup redefining the second-hand electronics market.

- Increased ML model accuracy up to 98% through feature engineering and validation.
- Enhanced model quality by annotating and refining training datasets.

05/2024 – 10/2024
Gurgaon

PROJECTS

Disease Prediction System, https://github.com/A81126/Disease_Predication_System.git

- Designed and implemented a disease prediction system using machine learning algorithms, enabling accurate and reliable diagnosis of diseases
- Developed an interactive web dashboard with Python, Django, and data visualization tools for real-time disease diagnosis

Automatic Attendance Management System, https://github.com/A81126/Automatic_attendance_sysytem.git

- Built an automated face-recognition attendance system, eliminating manual tracking for student attendance.
- Implemented automatic face detection with individual username/password login; supports on-the-spot student registration and duplicate sign-in notifications.

EDUCATION

B.Tech in Computer Science and Engineering,
Kamla Nehru Institute of Physical and Social Sciences
CGPA 7.8 / 10

08/2019 – 05/2023
