SUMMARY

Backend Developer with 2+ years of experience in designing and building scalable, high-performance backend systems using Python, Django, and FastAPI. Strong experience in developing RESTful APIs, optimizing databases (SQL & MongoDB), and improving API performance. Proven ability to build production-ready systems in logistics and e-commerce domains with a focus on scalability, performance, and clean architecture.

TECHNICAL SKILLS

Programming & Backend Development:

- Python
- Django
- FastAPI
- RESTful API Development
- Git & GitHub
- Microservices Architecture

Database & Optimization:

- MySQL
- MongoDB
- SQL Optimization
- Database Indexing
- Aggregation Pipelines

Concepts:

- Microservices Architecture
- Caching, Database Design
- Swagger, Postman
- System Design
- Database Design
- API Optimization

EXPERIENCE

Python Developer, AIVS PINCODEKART PVT LTD

Indian hybrid e-commerce platform connecting local sellers, manufacturers, and customers across 19,000+ pincodes.

11/2025 – Present
Udaipur, India

- Developed scalable backend systems using Django and FastAPI.
- Built RESTful APIs for AWB tracking, shipment routing, and dashboard analytics.
- Designed and optimized MongoDB queries, enhancing data retrieval efficiency.
- Reduced API response time by 30% through database indexing and query optimization.

Associate Software Developer, Xotiv Technologies

Software development company focused on providing innovative solutions

12/2024 – 10/2025
Noida

- Developed scalable backend systems and RESTful APIs using Django.
- Optimized SQL queries and indexing, improving database efficiency by 30%

Data Annotator, Cashify

Fast-growing startup redefining the second-hand electronics market.

05/2024 – 10/2024
Gurgaon

- Increased ML model accuracy up to 98% through feature engineering and validation.
- Enhanced model quality by annotating and refining training datasets.

PROJECTS

Disease Prediction System, https://github.com/A81126/Disease_Predication_System.git

- Designed and implemented a disease prediction system using machine learning algorithms, enabling accurate and reliable diagnosis of diseases
- Developed an interactive web dashboard with Python, Django, and data visualization tools for real-time disease diagnosis

Movies Recommendation System, https://github.com/A81126/Automatic_attendence_sysytem.git

- Developed a content-based movie recommendation engine using Python and machine learning algorithms, providing personalized recommendations based on genre, director, and top cast similarity
- Implemented data preprocessing and feature engineering techniques to enhance recommendation accuracy, precision, and relevance

EDUCATION

B.Tech in Computer Science and Engineering,
Kamla Nehru Institute of Physical and Social Sciences
CGPA 7.8 / 10

08/2019 – 05/2023
